

No-Code Business Solutions for Every Department

Quickly build and deploy cross-departmental business solutions using no-code tools—flexible enough to extend into pro-code when needed. Empower your teams to act fast, prototype faster, and scale smarter.

Health, Safety, Environment & Quality (HSEQ)

HSEQ Director | Head of Health & Safety | Head of Compliance | SHEQ Manager | Environmental Compliance Manager | Risk & Assurance Manager

#Workflow80 – Dynamic Safety Observations Log

Scenario

A HSEQ Director wants to boost proactive safety engagement across the business.

Problem

Near misses and positive interventions are underreported due to poor tools and no follow-up.

Solution

Use WorkMobile to deploy a digital safety observation form that's quick to complete, includes photo capture, and triggers alerts for follow-up. Build dashboards to track trends by site, team, or hazard type.

Health, Safety, Environment & Quality (HSEQ)

HSEQ Director | Head of Health & Safety | Head of Compliance | SHEQ Manager | Environmental Compliance Manager | Risk & Assurance Manager

#Workflow81 – Toolbox Talk Attendance & Acknowledgement

Scenario

A Head of Health & Safety needs proof that teams are briefed on key safety topics.

Problem

Toolbox talks are delivered on-site but often not recorded accurately.

Solution

Create a mobile workflow where supervisors log topics covered, attendees sign digitally, and records are time- and geo-stamped for compliance. The data syncs to a central log automatically.

Health, Safety, Environment & Quality (HSEQ)

HSEQ Director | Head of Health & Safety | Head of Compliance | SHEQ Manager | Environmental Compliance Manager | Risk & Assurance Manager

#Workflow82 – Policy Acknowledgement & Tracking

Scenario

A **Head of Compliance** must demonstrate that safety-critical policies (e.g., working at height, confined space) are understood by staff.

Problem

Distribution is easy via email or PDF— but tracking who has read, understood, and signed is near impossible.

Solution

Deploy digital acknowledgement forms with auto-reminders, expiry dates, and electronic signatures. Export audit-ready reports by user, date, or site.

Health, Safety, Environment & Quality (HSEQ)

HSEQ Director | Head of Health & Safety | Head of Compliance | SHEQ Manager | Environmental Compliance Manager | Risk & Assurance Manager

#Workflow83 – Integrated SHEQ Audit Checklist

Scenario

A **SHEQ Manager** needs to consolidate site audits into one clear process.

Problem

Safety, environmental, and quality checks are tracked on separate sheets, leading to duplication and reporting gaps.

Solution

Build a single, customisable SHEQ audit form in WorkMobile, with section scoring, attachments, and auto-escalation of non-conformances.

Health, Safety, Environment & Quality (HSEQ)

HSEQ Director | Head of Health & Safety | Head of Compliance | SHEQ Manager | Environmental Compliance Manager | Risk & Assurance Manager

#Workflow84 – Environmental Impact Log

Scenario

An **Environmental Compliance Manager** wants to track potential environmental incidents (e.g., spills, emissions, wildlife disruption).

Problem

These are rarely recorded unless they become major—and often buried in generic incident logs.

Solution

Deploy a dedicated environmental incident form with dropdowns for impact type, severity, and mitigation taken. Enable instant alerts for high-risk reports.

Health, Safety, Environment & Quality (HSEQ)

HSEQ Director | Head of Health & Safety | Head of Compliance | SHEQ Manager | Environmental Compliance Manager | Risk & Assurance Manager

#Workflow85 – Risk Register Updates & Approvals

Scenario

A Risk & Assurance Manager needs a live record of evolving risks across departments.

Problem

Risk logs are updated ad hoc via spreadsheets and lack real-time visibility or sign-off workflows.

Solution

Create a mobile-enabled risk update form, with fields for controls, severity scoring, owner assignment, and digital sign-off. Data flows into a central register with exportable reports.

Health, Safety, Environment & Quality (HSEQ)

HSEQ Director | Head of Health & Safety | Head of Compliance | SHEQ Manager | Environmental Compliance Manager | Risk & Assurance Manager

#5ReasonsWhy

5 reasons why IT leaders should choose **WorkMobile** to implement and manage digital workflows across the business

1. IT Stays in Control—Without Becoming a Bottleneck

WorkMobile empowers IT to oversee system governance, data security, and integration—while giving departments the freedom to build and manage their own workflows. IT can approve templates, set rules, and manage user access—without fielding every workflow request.

2. Rapid Deployment Without Custom Coding

Launch cross-departmental solutions in hours—not weeks. WorkMobile’s no-code platform allows IT teams to deliver tactical apps, forms, and reporting tools quickly, without needing to pull developers off core projects. Perfect for addressing urgent business needs fast.

3. Extendable with Pro-Code When Needed

Unlike basic form builders, WorkMobile is designed to scale. IT teams can integrate with existing systems (ERP, HR, CRM, Asset Management), use webhooks or APIs, and customise workflows with advanced logic—bridging no-code speed with enterprise-grade flexibility.

4. Built-In Compliance & Data Governance

Data is encrypted, audit-ready, and stored securely in the cloud. IT teams can enforce compliance policies across departments—ensuring workflows meet GDPR, ISO, or sector-specific standards with full version control, traceability, and approval tracking.

5. Consolidate Tools and Reduce Shadow IT

WorkMobile helps IT standardise the way forms, reports, and mobile data collection are built across the business—reducing the need for rogue spreadsheets, siloed apps, or unapproved tools. One platform. Multiple use cases. Total control.

About Workmobile

Many IT departments will be aware of the challenges involved in developing workflow solutions across departments. Capex, finding the right skillsets, time constraints in deploying and not to mention how to support multiple devices over the long term.

The solution? WorkMobile is an award-winning toolkit that allows you to quickly build solutions enabling staff to capture all essential data.

Available to use on every type of mobile device, it provides IT Managers, with a faster, cheaper and more efficient way to develop streamlined workflow solutions. Stored securely in the cloud, information can be easily accessed and shared. When necessary, businesses can develop a clear electronic audit trail to keep their customers fully informed.

Does it work? Well, since WorkMobile's inception, we have processed over 30 million records. We currently work with over 250 customers who are all benefiting from time and money savings, with the assurance that they are operating in the most compliant manner.

Our aim? To keep providing innovative solutions to our expanding customer base. We would love to help you improve your business processes and give you a competitive advantage.
