#Workflow130 – Project Status Update& Progress Tracking

Scenario
A **Programme Director** needs to track the status of multiple projects and identify blockers early.

Problem
Updates come in via spreadsheets and emails, making it hard to compare progress or spot delays.

Solution
Create a mobile-friendly form where project leads submit weekly updates—including milestones hit, risks flagged, and % complete. Auto-summarised into dashboards for instant oversight.

#Workflow131 – Capital Project Gate Approvals

Scenario
A **Capital Delivery Lead** needs structured governance through key project gates (e.g. feasibility, funding, build).

Problem

Approvals are delayed due to unclear forms and inconsistent documentation.

Solution

Build stage-specific gate review forms with required attachments (budgets, risk registers), role-based sign-offs, and built-in decision logs.

#Workflow132 – Site Readiness & Handover Checklist

Scenario
A **Construction Project Manager** wants to ensure every job is signed off properly before handover.

Problem
Snagging, inspections, and client approvals are done manually and rarely documented in full.

Solution
A structured handover checklist with space for site photos, client sign-off, and outstanding items—digitally stored and auto-emailed to stakeholders.

Project & Programme Management

Programme Director | Capital Delivery Lead | Construction Project Manager | Portfolio Manager | Head of Projects

#Workflow133 – Risk & Issue Escalation Log

Scenario
A **Portfolio Manager** needs visibility of risks across the entire project portfolio.

Problem
Risk logs are maintained locally and never make it to the PMO until it's too late.

Solution
Create a live digital risk register where project teams can escalate issues, log mitigations, and tag severity. Central PMO sees risk trends in real time.

#Workflow134 – Lessons Learned Capture

Scenario
A **Head of Projects** wants to ensure consistent post-project reviews and knowledge sharing.

Problem
Lessons learned are rarely documented or shared across teams.

Solution
Introduce a project close-out form prompting teams to reflect on wins, risks, delays, and future improvements. Auto-tag by project type for searchable reference.

#5ReasonsWhy

5 reasons why **IT leaders** should choose **WorkMobile** to implement and manage digital workflows across the business

1. IT Stays in Control—Without Becoming a Bottleneck

WorkMobile empowers IT to oversee system governance, data security, and integration—while giving departments the freedom to build and manage their own workflows. IT can approve templates, set rules, and manage user access—without fielding every workflow request.

2. Rapid Deployment Without Custom Coding

Launch cross-departmental solutions in hours—not weeks. WorkMobile's no-code platform allows IT teams to deliver tactical apps, forms, and reporting tools quickly, without needing to pull developers off core projects. Perfect for addressing urgent business needs fast.

3. Extendable with Pro-Code When Needed

Unlike basic form builders, WorkMobile is designed to scale. IT teams can integrate with existing systems (ERP, HR, CRM, Asset Management), use webhooks or APIs, and customise workflows with advanced logic—bridging no-code speed with enterprise-grade flexibility.

4. Built-In Compliance & Data Governance

Data is encrypted, audit-ready, and stored securely in the cloud. IT teams can enforce compliance policies across departments—ensuring workflows meet GDPR, ISO, or sector-specific standards with full version control, traceability, and approval tracking.

5. Consolidate Tools and Reduce Shadow IT

WorkMobile helps IT standardise the way forms, reports, and mobile data collection are built across the business—reducing the need for rogue spreadsheets, siloed apps, or unapproved tools. One platform. Multiple use cases. Total control.

About Workmobile

Many IT departments will be aware of the challenges involved in developing workflow solutions across departments. Capex, finding the right skillsets, time constraints in deploying and not to mention how to support multiple devices over the long term.

The solution? WorkMobile is an award-winning toolkit that allows you to quickly build solutions enabling staff to capture all essential data.

Available to use on every type of mobile device, it provides IT Managers, with a faster, cheaper and more efficient way to develop streamlined workflow solutions. Stored securely in the cloud, information can be easily accessed and shared. When necessary, businesses can develop a clear electronic audit trail to keep their customers fully informed.

Does it work? Well, since WorkMobile's inception, we have processed over 30 million records. We currently work with over 250 customers who are all benefiting from time and money savings, with the assurance that they are operating in the most compliant manner.

Our aim? To keep providing innovative solutions to our expanding customer base. We would love to help you improve your business processes and give you a competitive advantage.
